Path Testing / Coverage

[\[rcov\]](#)

outputs colorized html.

[\[Coverage\(XHTML\)\]](#)

outputs XHTML. is fairly stable.

[\[Coverage\(ANSI\)\]](#)

outputs ANSI. is experimental.

There is also a commercial coverage tool:

[\[Tool\]](#)

Profiling

Ruby is shipped with `profile` which is okay. See [Ruby Profiler](#).

Ruby doesn't quite work with Valgrind yet. See [RubyAndValgrind](#)

Benchmarking

Ruby is shipped with `benchmark` which is okay.

Static Analysis

RubyCheckr? is being worked on by [SeanCarley](#) and [PatEyler](#)
